

M-Nav 650

Job dispatch and precise navigation

Just accept and go!

Job dispatch and precise navigation right to your customer's doorstep...

You have demanded, we have provided...

Navman Wireless Business Solutions releases the first integration of job dispatch and satellite navigation.

Navman has combined it's tracking, messaging and state of the art satellite navigation device to provide you with an all encompassing business tool, which allows real-time messaging and routing from your desktop to the customer's doorstep.

M-Nav 650

Integrated tracking and navigation

"M-Nav has revolutionized the way we run our business and allocate jobs."

"It is simple, quick, has saved us huge amounts of time and increased productivity. M-Nav has made life easier by reducing workloads for our staff both on the road and in the office."

Robert Conn

Managing Director
KC Transport

Streamline office workflows

- Improved allocation of planned and reactive jobs
- Reduction in paper work
- Improved reaction time with the ability to dispatch the nearest vehicle to a job
- Monitor job completion rates

Less time, less confusion, less hassle

- No more A to Z, no auto route and no stress...just accept and go
- Full satellite navigation functionality
- Provides staff with an accurate ETA to a destination
- Two-way messaging both to and from the office

Increase your company's profitability

Improved Productivity

- Increase the number of jobs per week
- Reduce the amount of paper work both in the office and on the road
- More efficient job allocation

Reduction in Costs

- Reduce fuel costs with more efficient routing of vehicles
- Decrease in communication costs, using Vodafone GPRS data network

Improved Customer Service

- Provide accurate ETAs to your customers
- Reduced response times to your customers
- Quickly and professionally deal with any customer queries with accurate records
